Professional Summary

2026 B.Tech Computer Science graduate and **web developer** who builds and ships full-stack web applications end to end — **Python/Flask** backends with **authentication**, **role-based access control**, and **SQL** data models, and responsive frontends in **HTML**, **CSS**, **JavaScript**, **React**, and **Next.js/TypeScript**. Comfortable across the request path: routing, schema design, ORM queries, debugging, **Git** version control, and deployment to **Vercel** and **Render**. Seeking an entry-level Web Developer, Frontend Developer, or Full Stack Developer role.

Technical Skills

Frontend: HTML5, CSS3, JavaScript (ES6+), React.js, Next.js, TypeScript, Tailwind CSS, Bootstrap 5, Chart.js, Responsive Web Design, Jinja2 Templating
Backend: Python, Flask, Flask-Login, REST APIs, JSON, CORS, Session Authentication, Role-Based Access Control, MVC, Client-Server Architecture
Databases: SQL, MySQL, SQLite, SQLAlchemy ORM, Relational Schema Design, Aggregate Queries, CRUD Operations
Tools & Deployment: Git, GitHub, GitHub Actions, Vercel, Render, gunicorn, VS Code, npm, Vite, Chrome DevTools, Debugging
Computer Science: Data Structures and Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks, Software Engineering

Experience

AICTE–EduSkills, supported by Palo Alto Networks

Sep – Nov 2023

Cybersecurity Virtual Intern

Remote — India

- Completed a **10-week structured cybersecurity program** under the AICTE–EduSkills National Educational Alliance for Technology (NEAT) initiative, combining assessed coursework with a mentored project phase.
- Applied **secure development** awareness — authentication, access control, and common web vulnerabilities — to subsequent full-stack project work.

Projects

Client Project Tracking & Billing System | *Python, Flask, SQLAlchemy, MySQL, Bootstrap, Chart.js*

GitHub

- Built a full-stack **Python/Flask** web application for tracking client projects, employee assignments, and logged work hours, with server-rendered **Jinja2** views and a responsive **Bootstrap 5** interface.
- Implemented **authentication** and **role-based access control** with **Flask-Login** session management and hashed passwords, gating every admin and employee route by role.
- Built admin and employee dashboards with **Chart.js** visualizations, dynamic project search in **JavaScript**, and responsive **HTML5/CSS3** layouts.
- Designed a five-table **relational schema** (users, projects, assignments, timesheets, billing) in **SQLAlchemy** over **SQLite/MySQL**, including a many-to-many employee-to-project assignment model.

Personal Portfolio Site | *Next.js, TypeScript, Tailwind CSS, Vercel*

Live Site

- Built and deployed a personal portfolio site in **Next.js** and **TypeScript** with **Tailwind CSS**, shipped to production on **Vercel**.
- Implemented responsive, component-based layouts and accessible semantic markup across all breakpoints.

Deepfake Detection System using Explainable AI | *TensorFlow, Vision Transformer, Flask, React, OpenCV*

GitHub

- Developed a **Flask REST API** with **CORS** that accepts uploaded media, runs model inference, and returns predictions as **JSON**.
- Built the **React** client with **Vite** for image upload and live prediction display, consuming the Flask API.

Education

GL Bajaj Institute of Technology and Management

2022 – 2026

B.Tech in Computer Science and Engineering — CGPA: 7.05/10

Greater Noida, Uttar Pradesh, India

- Relevant Coursework:** Data Structures and Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks, Software Engineering.

Certifications

Python Essentials 1 & 2 — Cisco Networking Academy | Introduction to MongoDB — MongoDB University | Google Cloud Study Jams — GDSC | CCNA: Introduction to Networks — Cisco | Cyber Security Training — MeitY, Government of India

Leadership & Activities

Team Lead, Deepfake Detection Major Project: coordinated a four-member team, assigned development tasks, tracked progress, and presented technical work at faculty reviews.

Data Structures and Algorithms: continuous problem-solving practice on LeetCode and GeeksforGeeks; participant in college hackathons and coding events.
